E-mail: info@pet-gems.com

Ordering & Pricing

The easiest way to order is to contact us either through our website, email, or by calling 1-800-670-8329. Due to the numerous processes involved we are not always available to take clients calls. Please leave a message so we can contact you.

The price of a Pet-Gem is much less than most other types of jewelry in it's class, and also much less than diamond jewelry. A hand-crafted cut and polished Pet-Gem starts at only \$275.00.

Please feel free to contact us if you have any other questions about our gems, jewelry, or the creation process.

Pet-Gems Pet-Gems

*Because you never forget
your best friend...*

Pet-Gems™ offers a beautiful gift of specialized gemstone jewelry that will provide years of lasting memories of your pet friend.

About Pet-Gems

Pet-Gems™ is a family owned business directed at providing a beautiful and lasting memento for those who have lost their pet friend and would like to continue to cherish their memory. We do this by making handcrafted, custom cut gems and jewelry using your pets cremated remains.

Why Pet-Gems?

Over the years, we have all coped with pet loss from the passing of a special pet friend, who enriched our lives with their unconditional love. They gave us solace during difficult times, brightened our days with unbounded affection, took their scolding with affability, taught our children responsibility and in general made our lives, during their stay, much more fulfilling.

How Does It Work?

A small portion of your pets cremated ashes helps create an atmosphere in our equipment that influences the stones color through an ionic exchange. These colors range from blue, aqua, peach, white (diamond), and others. The change is helped by the composition of your pet ashes.

The resultant stone is the 'essence' of your pet since he or she is what dictates the final color!

What is a Pet-Gem?

A Pet-Gem is a natural zircon that has gone through a specially designed thermo/chemical process which induces an ionic exchange with your pets ashes. The content of your pets remains is what influences the final, permanent color in the raw stone. This natural zircon is then hand cut and polished by our lapidary artists to rival the beauty of a diamond. All stones are cut in the shape you select. Currently we offer custom designed round, oval, square, triangle, marquise and rectangle with or without checkerboard crowns.

Why Zircon?

Because it rivals the brilliance, dispersion, and refractive index of diamonds. Zircons have been used for decades to simulate natural diamonds in all types of jewelry. They lost favor when the synthetic material Cubic Zirconia flooded the jewelry market. Jewelers and gemologists started to confuse the two because of the name and this caused a decline in the use of the natural stone, even though it has a much greater value! CZ has no practical value because it is purely synthetic material, created cheaply in many countries and sold for pennies per carat. Natural zircon is more rare, more beautiful, and far more expensive.

What is Zircon?

A natural zircon is probably the oldest terrestrial material on earth. Many geologists consider it a symbol of 'forever' because they can be used to measure geological activity by examining the layers of their outer rind, much like a trees rings. Zircons have a moh's hardness of 7.5 which makes them very durable and they are highly resistant to chemical attack.

What Happens Next?

After the cutting and polishing stage your Pet-Gem will finally be ready for setting. If you requested that we set your gemstone it will be transferred to our jewelers and set in the ring or pendant that you chose. If you ordered a loose Pet-Gem then it will be shipped to you immediately.

Throughout the entire process your pets remains are treated with the utmost respect and care possible. We understand that you are entrusting us with the remains of a loved friend and family member.

Beliefs About Zircon

Zircon is believed by some to impart the wearer with wisdom, honor and riches. It is also thought to prevent nightmares and ensure a peaceful sleep. It is also the traditional birthstone of December.
